

## What's New in SIwave 2024 R2

- HFSS Regions: support for MCAD-ECAD hierarchy
- Electrothermal workflow: support for ECAD-ECAD hierarchical designs
- AI/ML memory consumption and simulation time prediction
- New CPA-Q3D workflow for improved performance and robustness
- Performance improvements on MCAD model export feature
- Dynamic link between SIwave near fields in HFSS 3D Layout and HFSS
- PI Advisor: results are now displayed in the same way as Ansys Electronics Desktop
- DC IR field plots with elevation according to the magnitude
