

What's New in SIwave 2025 R1

- Automatic circuit schematic creation from PI Advisor result schemes
- Pull excitations from circuits to SIwave Far Field simulation in HFSS 3D Layout
- SIwave MCAD model export enhancements
- CPA reports include RL per pin
- Fast DC correction to DC/AC blending algorithm
- AMD math libraries support for SYZ simulations
- Support for LC components for DC IR electrothermal flow
- Solver improvements to support large designs
- New workflow to generate solver input files (Beta)
